Locker Solutions

The Opendoor locker system is the smart solution for efficient use of personal and shared locker storage space.

Combining intelligent electronic lock hardware with powerful applications in a complete package the electronic smart lock that can be used in both existing storage lockers or with new locker furniture designs that blends into walls, floor consoles or any custom furniture your fit out requires.

Accessing locker storage should be as frictionless as possible for the user. Keys, padlocks, pin numbers all just slow users down, leading to frustration. Opendoor works seamlessly with the building access cards that guests already have to offer dynamic personal storage where and when its needed.

Unlike other Locker systems, Opendoor includes everything out of the box. No additional software charges, yearly renewals or premium vs standard software packages. Opendoor includes simple yet powerful administration along with detailed analytics and reporting. All inclusive.
